

Environment Policy

Environmental leadership and improvement

Water Corporation provides essential water, wastewater and drainage services to our customers across Western Australia. We take water from the environment and then return drainage water, treated wastewater and by-products to the environment.

We are committed to protecting and improving the environments in which we work or influence by complying with our environmental obligations, reducing our environmental impact and improving our environmental performance.

We are all responsible for protecting the environment as well as understanding and meeting our environmental obligations while improving performance.

We identify, manage and eliminate risks to the environment. We seek to prevent pollution and enhance the environments in which we work.

We have strong governance structures supporting our environmental objectives.

Our objectives include

- no net greenhouse gas emissions by 2050
- protecting the oceans and waterways we influence
- increasing reuse of treated wastewater
- reducing water use per capita to conserve resources
- sustainable use of resources with no net clearing of native vegetation.

We regularly review our environmental objectives and targets to ensure they remain relevant and reported internally and publicly to measure our performance.

Pat Donovan
Chief Executive Officer, Water Corporation

This policy applies to all Water Corporation workers and includes all activities and services we provide in accordance with our operating license. We will provide the necessary resources, systems, training and mechanisms to improve our environmental performance.
