SURFACE PREPARATION FOR THE APPLICATION OF PROTECTIVE COATING ON CONCRETE

SPECIFICATION: A5  ISSUE: 3  DATE: JULY 2019

1.0 SCOPE

The scope of this coating specification applies to operations required for the surface preparation of concrete.

Refer Design Standard, DS 95 (Standard for the Selection, Preparation, Application, Inspection and Testing of Protective Coatings on Water Corporation Assets) for additional information or clarification.

2.0 PURPOSE

The purpose of this coating specification is to prepare a concrete substrate for the application of a protective coating.

3.0 DEFINITIONS

| Contractor: The service provider or its sub-contractor who will undertake the works. |
| Corporation: The Water Corporation and the Principal for the purposes of externally contracted asset delivery. |
| ITP: The detailed Inspection and Test Plan(s) for the Works. |
| NACE: National Association of Corrosion Engineers. |
| Superintendent: The Superintendent for the contract, as defined in the conditions of the contract, who is appointed by the Water Corporation to manage/oversee the work under the contract on behalf of the Water Corporation. |
| Works: The surface preparation, coating application and inspection to be undertaken by the contractor to which this coating specification applies. |
SURFACE PREPARATION FOR THE APPLICATION OF PROTECTIVE COATING ON CONCRETE

SPECIFICATION: A5 ISSUE: 3 DATE: JULY 2019

4.0 GENERAL

4.1 Work shall only be carried out by competent personnel.

4.2 The work shall be undertaken by an approved Water Corporation Corrosion Control Panel Services member, unless approved otherwise by the Team Leader – Asset Durability.

4.3 The Applicator’s Coating Supervisor shall possess as a minimum one of the following certifications:

- ACA - Coating Inspector; or
- NACE - CIP Level I Coating Inspector.

4.4 The coating contractor shall nominate a Coating Inspector as their Quality Control Officer to carry out inspections, submit the ITP, undertake the required testing and maintain appropriate records for all work performed.

The Applicator’s Coating Inspector shall possess as a minimum one of the following certifications:

- ACA - Coating Inspector; or
- NACE - CIP Level I Coating Inspector.

5.0 ATMOSPHERIC CONDITIONS

5.1 Prior to and during surface preparation, the contractor shall record details pertaining to environmental conditions including ambient and surface temperature, relative humidity and dew point.

6.0 SURFACE PREPARATION

6.1 All visible contaminations dirt, laitance, sludge and other foreign matter shall be removed from the surfaces to be coated by “appropriately rated pressure” water blast for the structures. Follow the paint manufacturer recommendation for water wash pressure. References shall be made to the SSPC-SP13/NACE 6 standards on surface preparation of concrete structures.

6.2 Concrete work not required to be coated shall be protected with masking materials which shall be completely removed by the Contractor after completion of the work.

6.3 All sharp edges shall be chamfered and profiled.
6.4 A terminating groove shall be installed when the coating that is to be applied requires a terminating groove. [Refer to Figure 1].

Figure 1 – Terminating Groove Details.

7.0 INSPECTION

7.1 The contractor shall maintain records and evidence of the original surface, blast surface and blast profile. These shall be made available to the Superintendent and/or delegate at the completion of the project. Evidence of these parameters shall be provided by means of photographic evidence.

7.2 The Contractor shall provide the Superintendent (or nominated delegate) adequate prior notice as to when and where the surface preparation and coating operations will be conducted to facilitate all specified inspections.

7.3 If recognised as a hold point in the ITP, the coating application shall not be carried out until the Superintendent has accepted the surface preparation.

8.0 CONTRACTOR'S RESPONSIBILITY

8.1 The Contractor shall supply all necessary plant, equipment, materials and labour, prepare the surface and apply and maintain the protective coating in accordance with this specification.

8.2 An Inspection Test Plan (ITP) shall be forwarded to the Water Corporation for review a minimum of ten working days prior to the commencement of work.

8.3 A list of all items to be inspected and the relevant drawing reference shall be forwarded to the Water Corporation Coating Inspector prior to the inspection being undertaken.
SURFACE PREPARATION FOR THE APPLICATION OF PROTECTIVE COATING ON CONCRETE

SPECIFICATION: A5           ISSUE: 3           DATE: JULY 2019

8.4 The preceding inspection clauses shall not relieve the Contractor of their responsibility to supply materials and perform work in accordance with the requirements of any overriding contract documentation.
