

## Standard Signage for Treatment & Chemical Dosing Plants

### HAZARDOUS CHEMICALS ANTI-SCALANT FACILITY

#### ANTI-SCALANT FACILITY SIGN (DS WCSS059-1)

This **Hazardous Chemical** sign has white text on a lilac background.  
Material: Metal or Vinyl – 450 (W) x 300 (H) with other dimensions as indicated.

- The **Anti-Scalant Facility** sign shall be posted on the outside wall near each entry door to the store, but not to be obscured when the door is open.
- The **Anti-Scalant Facility** sign shall be displayed at a level so that it is visible from the normal direction of approach.

Note 1: This sign is for Anti-Scalant that is not a Dangerous Good but is a Hazardous Chemical by classification. The pictogram will either be an exclamation mark OR a corrosive symbol dependant on the type of Anti-Scalant to be stored.

Note 2: Other concentrations and varying product ingredients may trigger Dangerous Goods classification instead. Always check the supplier SDS to establish the correct signage and/or labelling requirements for this product. The Dangerous Goods sign would be completely different from this template – it is recommended to discuss with Water Treatment Advisory.
