

Standard Signage for Treatment & Chemical Dosing Plants

BULK OR PACKAGE CHEMICAL STORES

EMERGENCY ASSEMBLY POINT SIGN (DS WCSS300)

This **Emergency Information** sign is in landscape format with white text on a green background.

Material: Metal – 300 (W) x 225 (H) with the other dimensions as indicated.

- **The Emergency Assembly Point** sign should be mounted on a post or fence in an appropriate safe location as indicated in the emergency response plan (ERP). It shall be located upwind of any chlorine store and take into account prevailing winds.
- **The Emergency Assembly Point** sign may not be required at smaller sites/facilities that have a single entry gate and or other gates relatively close to the chemical store. This would potentially place the assembly point(s) outside the site therefore no sign would need to be erected.
- **The Emergency Assembly Point** sign should be displayed at a level so that it is visible from the normal direction of approach.
