These Pipe Identification Markers are for pipes greater than 40mm and must comply with AS 2700 - 2011 & AS 1345 – 1995 (text colour indicating their contents, a background colour, and a white contrasting border with chevron(s) to indicate flow direction).

Material: Self-sticking vinyl.

- The Large Chemical Pipeline marker(s) are to be posted adjacent to all junctions, valves, service appliances, bulkheads, wall penetrations (and the like) and spaced not more than 8 metres apart.

- The Large Chemical Pipeline marker should be prominently displayed on the pipe work to ensure the observer can clearly read the information.

- Note: Wherever there is special hazard (e.g. Dangerous Goods) that may cause harm to operators/maintainers within a service, then an additional yellow & black stripped band shall be displayed in conjunction with the Identification Pipe Marker.
