Downgrade water service application

Conditions relating to downgrade of water supply

- I hereby apply for a reduction in the size of the water meter on the water supply connection to the above property.
- I understand that before the water meter is changed, I have to pay all amounts associated with this application in advance, unless other payment arrangements have been made with Water Corporation.
- I understand that Water Corporation may fit a flow control valve (FCV) appropriate to the peak flow rate that I have nominated. A flow control valve is a device that is fitted to a non-residential water service to limit the flow of water through the service to a predetermined amount.
- I hereby acknowledge that I have been advised by Water Corporation to obtain the advice of a Plumbing Consultant, to determine the peak flow rate required to service the property, prior to submitting this application.
- I understand that a reduction in the flow rate to the above property may result in modifications being required to the internal plumbing and I hereby acknowledge that I have been advised by the Corporation to obtain the advice of a Plumbing Consultant to determine any such modifications.
- I understand that a reduction in the size of the water meter on the water supply connection to the above property will result in a reduction in the pressure and flow available within the above property.
- I understand that if an increase in the size of the water service is required in the future, I will be required to pay the Infrastructure contribution associated with that increase.
- In all cases except where it is excluded in the Operating Licence, Water Corporation will provide a minimum static pressure of 15 metres head within the Perth Metropolitan Area and minimum static pressure of 13 metres head within country urban areas. No higher pressure shall be relied upon for any purpose.

Conditions

With respect to this application, I acknowledge and agree that the approval of this application and provision of a service will be subject to the [Standard terms and conditions](#).

I have read and understood these terms and conditions.
