## IMPORTANT INFORMATION

1. **Damaging pipelines can be expensive** and highly disruptive to the community. Parties working near Water Corporation assets must take all necessary steps to prevent damage and are responsible for any damage (and any associated repair costs) arising from their actions.
2. **Damage to pipelines can be caused by factors** such as: direct contact and striking, disturbing pipe foundations or support, soil subsidence, applying excessive loads, impacts, shock or vibration, insufficient separation distances, damaging cathodic protection systems, or by other means.
3. **Some work-related activities may damage pipelines** even though they are conducted some distance away. Examples are heavy vehicles crossing pipelines (other than on public roads), poor selection of laydown / storage areas, installation of soil anchors, piling and blasting.
4. This **risk assessment must be communicated** to all relevant work crews and must be retained on-site for the duration of the works.
5. This **document is valid for 180 days** from the date of authorisation unless otherwise stated. Should the planned work be delayed or change significantly an extension must be requested or a new risk assessment undertaken with the Water Corporation.
6. The **location and positive visual identification by potholing** of all buried assets likely to be affected by the works is the responsibility of the party conducting the works. Other asset owners with buried facilities in the vicinity must also be contacted for their requirements.
7. **Potential hazards** associated with Water Corporation assets include, but are not limited to:
  - a. Large forces associated with the release of water or wastewater under high pressure;
  - b. Rapid release of large volumes of water which may lead to drowning or traffic hazards;
  - c. Biological hazards associated with contact with wastewater
  - d. Exposure to asbestos (asbestos cement pipe and asbestos in some pipe wrapping);
  - e. Exposure to toxic gases in the wastewater system;
  - f. Exposure to hazardous waste discharged by various industries to the wastewater system;

- g. Ignition of combustible gases in the wastewater system;
  - h. Fall hazards associated with accessing manholes or high structures;
  - i. Electric shock hazards arising from electrical infrastructure in the vicinity of pipelines, electrical faults or lightning;
  - j. Secondary hazards arising from damage or disruption to other structures or services due to damaged pipelines; and
  - k. Failure of an asset due to ageing, corrosion and/ or mechanical failure.
8. **Unauthorised opening of, or access to**, Water Corporation sewers and other assets is prohibited.
  9. Parties are responsible for all **OSH and public safety requirements** associated with their works. All works must be carried out in accordance with relevant acts, regulations, standards, codes of practice.
  10. Parties are responsible for arranging any **approvals, clearances, etc.** required by other agencies.
  11. **Asset Protection Officers patrol frequently**. The Water Corporation reserves the right to inspect the works and / or have an officer on site during the works.

Avoid damage: **Plan, Prepare, Pothole, Protect, Proceed**

## Safety Annex

### Safety - Your Responsibility

**At all times the safety of the general public and your employees for your works remains your responsibility.**

- You therefore have to determine how to best conduct your work near our asset while ensuring that you maintain a safe system of work at all times.
- You have a duty or care to ensure that your works do no damage or interfere with our assets or cause hazards to any party.

### Potential Hazards

Potential hazards associated with Water Corporation assets include, but are not limited to:

- Large forces associated with the release of water or wastewater under high pressure
- Rapid release of large volumes of water which may lead to drowning or traffic hazards
- Biohazards associated with contact with wastewater
- Exposure to asbestos (asbestos cement pipe and asbestos in some pipe wrapping)
- Exposure to toxic gasses in the wastewater system
- Exposure to hazardous wastes discharged by various industries to the wastewater system
- Ignition of combustible gasses in the wastewater system
- Fall hazards associated with accessing access chambers or high structures
- Electric shock hazards arising from electrical infrastructure in the vicinity of pipelines, electrical faults or lightning
- Secondary hazards arising from damage or disruption to other structures or services due to damaged pipelines
- Failure of the asset due to ageing, corrosion and/or mechanical failure which can have hazardous impacts.

### Responsibility

Parties are also responsible for all **OSH and public safety requirements** associated with their works. All works must be carried out in accordance with the relevant acts, regulations standards and codes of practice, as well as arranging any approvals, clearances etc required by other agencies.

### Authorised Access Only

Unauthorised interference with Water Corporation sewers and other assets (including uncovering, opening or repairing) is prohibited and may result in prosecution under the *Water Services Act 2012 (WA)*.

### Limitations on Working Near Our Assets

Under Section 90 of the *Water Service Act 2012 (WA)*:

- (1) *A person must not erect, construct, install, place, or demolish any building, plant, wall, fence or other obstruction — (a) in, on, over or under; or (b) within the prescribed proximity (if any) to, water service works of a licensee, except in accordance with the approval of the licensee.*
- (2) *A person must not drill, bore, excavate or use impact equipment within the prescribed proximity to water service works, of a prescribed kind, of a licensee, or engage in any other activity within the prescribed proximity that may damage those works, except in accordance with the approval of the licensee.*

**Penalty: \$10,000 for an offence under section 90(1) and 90(2) respectively.**

### Disclaimer

Any plans or other information provided by Water Corporation must be used as a guide only. Plans (including the location of pipes and other assets) are approximate only and it is your responsibility to locate the exact location of Water Corporation assets before commencing work. Water Corporation does not warrant or make any representation as to the accuracy, completeness, reliability, currency, quality or fitness for purpose of any plans or other information (including, but not limited to, the accuracy of the scale of, or the location of, anything shown on any plan or diagram). For further information on work planning and pipeline protection refer to the Water Corporation website (<https://www.watercorporation.com.au/Developing-and-building/Working-near-assets/Technical-requirements>).
