

Irrigation test card

Remember to only test your irrigation before 9am or after 6pm on one of your allocated watering days.

How to use this card:

1. Turn off all of your water using appliances prior to testing your irrigation.
2. Run your irrigation one station at a time, reading the meter before and after each station.
3. When reading your meter, make sure to read it from left to right and record the black and red numbers.
4. Calculate your water use by subtracting the difference in the meter reads before and after your irrigation station.

Please tick the sprinkler type/s that are present at your property.

Information about the different sprinkler types is available at watercorporation.com.au/sprinklers

Pop-up/fixed spray

Rotary

Gear drive rotator

Dripline

Hose attachment

Date	Time	Station no	Meter reading before	Meter reading after	Water use (litres)	Minutes per station	Sprinkler type (if different between stations)
