Plumbing/Hydraulic Plans

6. Plans attached showing Trade Waste Processes and Pre-treatment

Yes No

Note: Not providing required plans may result in processing delays and additional charges

Important Notes

1. All waste discharged to sewer must meet our acceptance criteria. For further information, please visit: <https://www.watercorporation.com.au/Help-and-advice/Trade-waste/Permits-and-charges/Trade-waste-permits/Acceptance-criteria-for-trade-waste> or search "Acceptance Criteria" on our website.
2. Triple/double interceptor traps are **not** approved pre-treatment products by Water Corporation. For a list of approved products search "Oil-water separators" on our website.
3. Radiator coolant (glycol) is a prohibited discharge to sewer and must be stored and transported off site by a Controlled Waste licenced liquid waste contractor.
4. The water supplies serving the wash down bays are required to have an appropriate testable backflow prevention device fitted (for further details search "Backflow Prevention").
5. Unroofed wash down areas are not to be greater than 20m². Areas larger than 20m² are required to be roofed unless specific approval is given by Water Corporation.
6. Wash down areas are required to have a bund or be designed in such a way to prevent excess rainwater entering the sewerage system. Areas adjacent to the wash down area are to be graded away from the wash bay.
7. Only Quick-break detergents are to be used.
8. All chemical Safety Data Sheets (SDS) must be available on request.
9. Please provide all required information to avoid processing delays and additional charges.
