6 Business information

What is the type of business discharging liquid waste from this property?

- Restaurant Takeaway Food Garage/Mechanic Butcher Swimming Pool
 Retail Fuel Laundry Carwash Photographic/X-ray Retail Bakery
 Multi Storey Development Number of floors: _____
 Other (describe) _____

Business operating hours (or intended operating hours)

	Mon	Tue	Wed	Thu	Fri	Sat	Sun
From							
To							
From							
To							

Describe any seasonal variations to these operating times.

Indicate sources of water used in waste producing processes. Mains Bore Other

Plumbing Contractor details: _____ Phone No: _____
(If known)

Application to discharge commercial and trade wastewater to sewer

7 Details of processes producing liquid waste

What is/are the relevant business processes or areas which produce waste and discharges to sewer?

- Meal Preparation Food Processing or Manufacture (including Butchering) Mechanical Servicing
 Printing Bin Area Laundromat Waste Commercial / Industrial Laundry Waste Cooling Tower

If the waste producing stream is not listed above, please describe in the space provided below.

A set of hydraulic services plans (showing water and sewerage) and site layout plans are mandatory attachments required to be submitted with this application.

For small commercial businesses it may be possible to show both hydraulic services and site layout on a single plan (see examples on page 5). More complex sites will need separate documents and may need multiple sets of plans covering different parts of the site.

8 Trade waste flow details

This section must be completed for all businesses except small retail food outlets such as restaurants and takeaway food stores.

Total discharge Kilotres/day

Average discharge rate Kilotres/hour

Peak flow rate Litres/second

9 Declaration

I / We declare that:

1. All relevant information and data has been included or attached to this Application and are true and correct.
2. I / We will comply with the conditions of the Trade Waste Approval.

Applicant's full name Mr Mrs Ms _____
(Business owner or authorised senior representative – please print clearly)

Position in the company _____

Signed _____ Date _____

Information for Applicants

1. These notes are provided to assist you in completing the Trade Waste Application. Please read and complete the application carefully and any Application Supplements relevant to your business.
2. This application must be completed by the business owner or senior corporate representative. **It is the business owner's responsibility to understand the nature of the waste they intend to discharge into Water Corporation's sewer.**
3. No plumbing or drainage works associated with the intended discharge of Trade Waste to the Corporation's sewer should be commenced until the Trade Waste Application has been approved by Water Corporation.
4. Submission of this application does not infer any right to discharge, nor does it infer that permission to discharge will be granted.
5. Where full information cannot yet be provided, clearly state the reason at the appropriate places. Please try to provide all the information requested as incomplete applications may delay the processing and issuing of approvals. Sufficient information on the proposed process or operation must be provided to enable us to estimate the likely waste discharge composition and flow characteristics.
6. Please print in ink.
7. Return the completed application, supplement form and hydraulic plans to your local Water Corporation office by post or email as per the contact details given on page 6.

What is Trade Waste?

Trade waste is any liquid, solid or gaseous refuse from any business, industry, warehouse or manufacturing premises other than domestic sewerage or unpolluted water.

Water Corporation's Trade Wastewater Disposal Service

Water Corporation offers an environmentally sound, commercially-based liquid waste disposal acceptance service to the non-residential sector. This service is conditional upon the wastewater meeting environmental and public health requirements, and the Corporation's facilities being capable of adequately conveying and treating the wastewater discharged.

To use the trade waste disposal service, business operators must hold a current trade waste permit from Water Corporation.

This permit must be obtained prior to the discharge of any trade wastewater to sewer.

Water Corporation conducts ongoing sampling and inspections to monitor the performance of the trade waste system and the composition of wastewater entering the sewer.

Customers are encouraged to minimise their charges by installing appropriate trade waste pre-treatment facilities and efficiently managing their operation.

Application to discharge commercial and trade wastewater to sewer

Attachments to the Trade Waste Application

Mandatory attachments - all applications

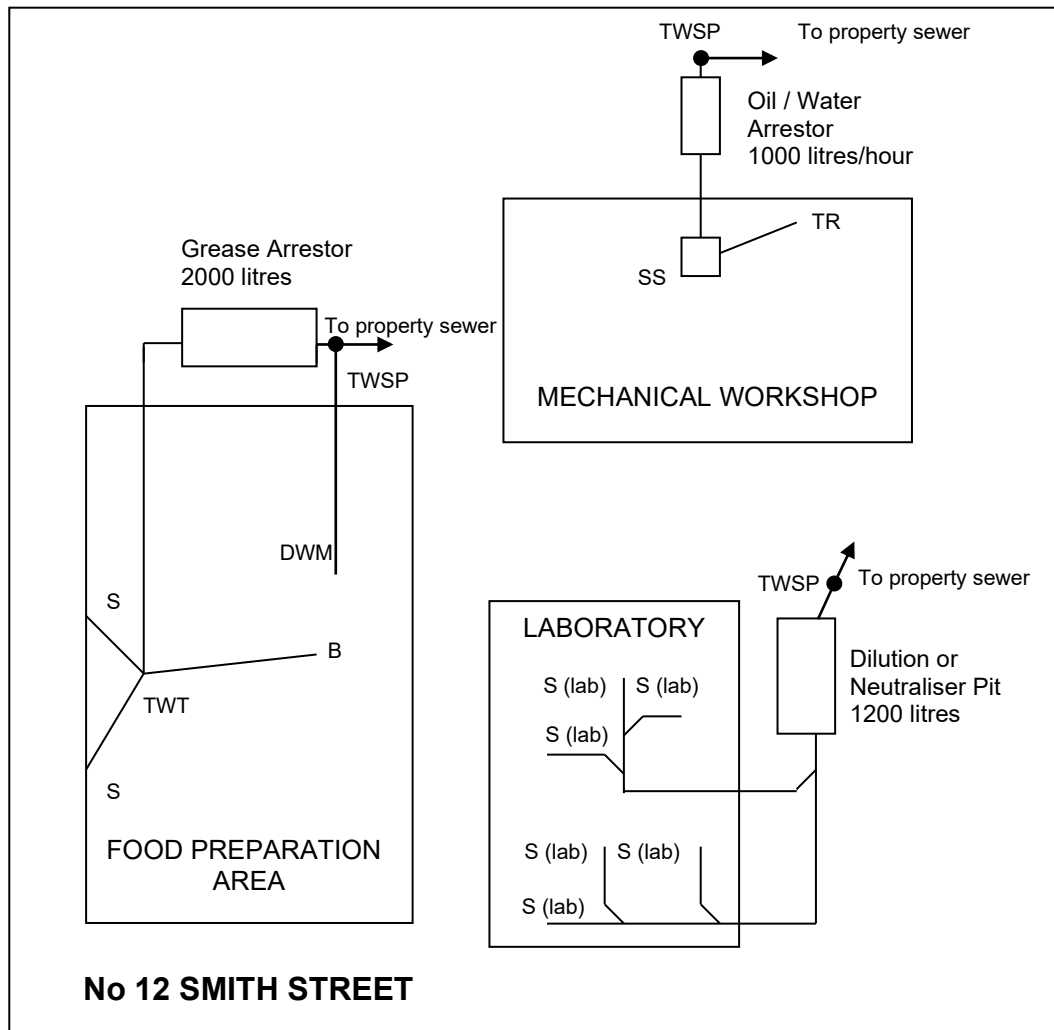

Provide a **set** of a hydraulic services plan and site layout plan for the property. For small commercial sites, a single plan may be able to show both hydraulic services and site layout. More complex sites may need multiple sets of both hydraulic services and site layout plans covering different parts of the site.

See the example below showing three (3) different small commercial installations.

The layout plan must include the following detail:

- The property address, site boundaries, and the location of all fixtures, tanks, pits, and apparatus which are associated with the generation and treatment of trade waste.
- All plumbing and fixtures used for trade waste purposes. A fixture is a source from which trade waste is generated, such as a sink, trough or floor area.
- The make and model of trade waste pre-treatment fixtures.
- Dimensions of any unroofed open area draining to sewer.
- If available, provide the contact details of your chosen licensed plumber.

Scale as appropriate

Fixture Legend

B Basin	S(Lab) Laboratory Sink	TR Trough
TWSP Trade Waste Sample Point	SS Silt Sump	DWM Dish Washing Machine
TWT Trade Waste Trap	S Sink	

To size grease arrestors search "[Grease arrestor sizing](http://www.watercorporation.com.au)" via www.watercorporation.com.au.
