

Operational Log

GRAF product:	Capacity (l):	Identification plate:
Premises installation address:		
Name of the business:		
Contact of installer:		
Date of installation:		
Contact of commissioner:		
Date of commission:		
Contact of licensed liquid waste transporter to be contacted for maintenance*:		
Contact of operator to be contacted for inspection:		

*A maintenance contract is to be in place to ensure the ongoing reliability of the product and that discharges to sewer comply with Acceptance Criteria for Trade Waste. Pump put and refilling arrangements are essential for product performance and are a responsibility of the customer as per their discharge permit.

Inspection, maintenance, sampling, and what to do in the event of a fault are procedures described in the operation manual that must be followed and all the dates must be registered in the operational log. Please include remarks such as changes of the maintenance contractor, replacement of damage covers, unexpected material found in the discharge, and any other relevant event to the product.

Note: *GRAF Australia Pty Ltd does not accept any liability for incorrect operation. This Operation Log is a suggested template for records that must be maintained and do not replace demands that might be specified by the relevant authority of jurisdiction.*

Date	Time	Inspection, Maintenance, Sampling, Faults, and other remarks
