

**SMALL – QUICK – EASY TO USE**

# Solo

## Bedpan Disposal System

---

*With proven reliable technology, fast, economical operation and a compact footprint, the **Solo** by Haigh has been designed to give Nurses, Estate Managers and Site Operators convenience without compromise when it comes to waste disposal.*

---

## Small

Solo bedpan disposal machine is ideal for situations where traditional bedpan disposal machines simply are not suitable, giving you much more flexibility when it comes to making a clean, convenient, efficient environment for carers and patients alike.

Combining Haigh's proven disposal technology into a compact footprint

- ✓ High Speed – cycle time < 60 s
- ✓ Low usage areas
- ✓ Disposal closer to the patient
- ✓ Free up space in sluice-rooms
- ✓ Fits in patient and isolation rooms
- ✓ Use less water and electricity\*

Often it is simply the case that a Solo is all that is needed rather than a higher capacity.

## Simple

**Solo** is designed to keep waste disposal as straightforward as possible for the both user and facility managers

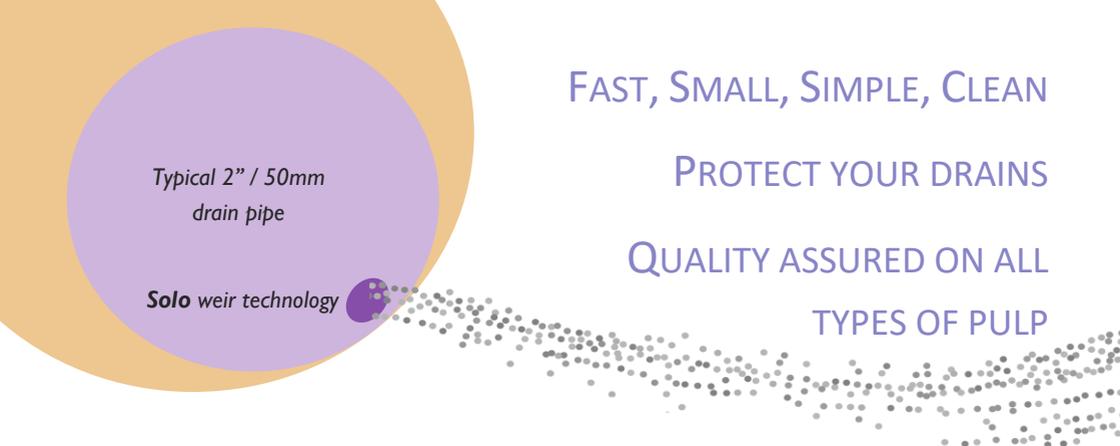

- ✓ Intuitive reliable process
- ✓ Ergonomic easy to clean surfaces
- ✓ Embedded silver-ion antimicrobial external surfaces for improved infection prevention
- ✓ RFID lock option\*\* to prevent mis-use

Solo can also be internet enabled\*\*\* to provide you with remote diagnostics, alerts helping with a smarter approach to your asset maintenance and management.

\*10 litres per cycle, more than 7 litres less than a typical 4-pan capacity machine

\*\* RFID lock option is a paid-for extra that requires the operators to carry an ID card

\*\*\* internet enabled Solo is a paid for option that requires an ongoing subscription

Typical 2" / 50mm  
drain pipe

**Solo** weir technology

FAST, SMALL, SIMPLE, CLEAN

PROTECT YOUR DRAINS

QUALITY ASSURED ON ALL

TYPES OF PULP

*Free flowing particles particle size limited by weir technology*
