## 1. Introduction

The Perth Groundwater Replenishment Scheme Stage 2 proposal is for the construction of an Advanced Water Recycling Plant at the Beenyup Wastewater Treatment Plant in Craigie, and the construction of water recharge and conveyance infrastructure to recharge up to 14 GL of recycled water that meets Australian Drinking Water standards to the Leederville and Yarragadee aquifers.

This Compliance Assessment Report has been prepared for the Perth Groundwater Replenishment Scheme as described in Ministerial Statement (MS) 1065 for the reporting period from October 2023 to October 2024.

The document has been prepared to meet the requirements of Condition of 4-6 of MS 1065 which states, in part, that the proponent shall submit to the CEO a Compliance Assessment Report annually from the date of submission of the first Compliance Assessment Report, or as otherwise agreed in writing by the CEO.

## 2. Summary of proposal's implementation status:

The proposal was implemented in accordance with Table 2 of Schedule 1 (as amended) of MS1065 and is currently in operational phase.

The table below provides an overview of the current status of the different components of the proposal.

Component	Status	Issues
AWRP	Construction of the AWRP has been completed.	No issues
Recharge Pipeline – trenchless	Construction and pipeline installation has been completed.	No issues
Recharge Pipeline – Open trench	Construction and pipeline installation has been completed.	No issues
Northern Recharge Site	Bore commissioning completed June 2022; operational and recharging.	No issues
Southern Recharge Site	Bore commissioning completed June 2022; operational and recharging.	No issues
Groundwater Recharge	Aquifer recharge (post-commissioning) commenced in July 2022.	No issues
Post Construction	Revegetation and Weed Management Plan implemented, and Final Revegetation Monitoring Reports received.	Additional infill planting brought the site above the vegetation density targets
Impact to Banksia Woodlands	Vegetation Health Monitoring Plan implemented, and 2024 Final Technical Report received.	No evidence of adverse impacts at area A or B

### 3. Compliance Status

#### Statement of Compliance

A Statement of Compliance has been prepared (refer to Attachment 1), which includes an audit table summarising the compliance status of each condition within Ministerial Statement 1065.

Due to the successful completion of all components of the proposal, including the rehabilitation of the Banksia woodlands as stipulated in Conditions 7-2.2 and 7-2.3, the five-year rehabilitation program has concluded, and the site now exceeds pre-construction vegetation density targets.

#### Non-compliances

There were no non-compliances identified in this reporting period.

#### Audits

No external audits of the Ministerial Statement were carried out in the reporting period. An internal audit was carried out in the form of the Audit Table within Attachment 1.

#### Complaints

No complaints were received in relation to the proposal within the reporting period.
