

Metropolitan water supply improvements – Town of Victoria Park

Notice of Proposal to construct new water main in Lathlain

Between May and August 2020 Water Corporation proposes to carry out essential work to install a new water main along Cornwall Street, Gallipoli Street, and Streatley Road in Lathlain.

The new water main will help improve the security and reliability of water supply to Lathlain, Rivervale and surrounding areas for decades to come.

This work includes:

- Constructing 378 metres of water main within the east-bound traffic lane of Cornwall Street between Castle Way and Gallipoli Street.
- Constructing 114 metres of water main within the south-bound traffic lane of Gallipoli Street between Cornwall Street and Streatley Road.
- Constructing 427 metres of water main within the east-bound traffic lane of Streatley Road between Gallipoli Street and Goddard Street.
- Connecting the new water main to the surrounding water network.
- Full restoration of impacted areas.

Construction will be carried out by a combination of open excavation and underground tunnelling.

The location of the work is shown in the map provided.

Please view instructions in the attached letter if you would like to raise any objections or concerns about this proposed work.

A copy of this plan is available on the project webpage at: www.watercorporation.com.au/pipesforperthmetro
