

Wanneroo Groundwater Bores

Notice of Proposal

Water Corporation are planning to construct two new abstraction bores in Wanneroo.

Bores are being drilled into Perth's two deepest confined aquifers – the Leederville Aquifer between around 300 metres and 500 metres deep and the Yarragadee Aquifer between around 900 metres and 1400 metres deep.

Subject to obtaining all necessary approvals, the first stage of the proposed work is scheduled to commence mid-2024 and will take approximately 6 months to complete.

The first stage involves site preparation and geotechnical surveys and drilling of the deep underground bores. This will be followed by the second stage of the proposed work, which involves construction of the above ground bore infrastructure including pumps, pipework and an electrical building. The second stage is not due to start until approximately 2026.

Please refer to the instructions below or in the attached letter if you would like to raise any objections to the proposed work.

Any objections to the proposed works will be considered if lodged in writing and addressed to the Project Manager 15 March 2024, Water Corporation, PO Box 100, Leederville, WA, 6902, within 21 days from the date of issue of the accompanying letter.

For further information on the project about the proposed work please see:
