## Water supply improvements

### Notice of Proposal to construct a new water main and surge vessel tank in Orelia

To ensure we can continue to reliably supply water to the growing community, we are proposing to construct:

- Approximately 500m of underground steel water main.
- A new surge vessel tank within our reserve along Portchester Avenue.

Construction will be carried out in stages by open trench excavation to reduce the impact on road users and residents. Impacted areas will be reinstated upon completion of the work.

The location of the work is shown on the map provided.

Subject to obtaining all necessary approvals, we anticipate this work to start in early-2021 and to take approximately three months to complete.

Further information may be obtained by contacting the Project Manager, Angelmo Shanmuganathan, by email at [Angelmo.Shanmuganathan@watercorporation.com.au](mailto:Angelmo.Shanmuganathan@watercorporation.com.au) or phone (08) 9420 2275 (during office hours). Any objections or comments on the proposed work can be made in writing to the Project Manager, Angelmo Shanmuganathan at PO Box 100, Leederville WA 6902 by 5:00pm on Monday 9 November 2020, fully stating your reasons for the objections.
