

Ashfield water pipeline upgrades

Project update – start of work

What is happening?

We'd like to update on the Ashfield Water Pipeline Upgrade project. Our authorised contractor, DMC will soon commence construction to install a new water pipeline near the Ashfield Train Station, which will replace the existing pipeline.

This project will help to shape WA's water future by securing the supply of water to Ashfield and Bassendean.

When is this happening?

From early February, preparation work will commence within a section of Ashfield Reserve (Cnr Fisher Street and Guildford Road) to set up our site office and storage area for the project. You may notice extra construction vehicles and minor traffic management around this area.

Construction work will commence from mid February to construct two large pits, at Ashfield Reserve, and Railway Parade (see map below) The pits will allow a microtunnelling machine to drill and install a new pipe under Guildford Road to Railway Parade to connect to our existing water pipe network.

This work is expected to be complete by early May 2025. Throughout this time, work will mainly take place from **Monday to Saturday between 7am and 5pm**. When night work is required, residents and businesses will be notified at least 48 hours in advance.

What should I expect?

As with any construction activities, there will be an increase in vehicle movement, noise and dust in the area.

Traffic management signage and personnel will be on-site to direct vehicles and pedestrians safely around the work area.

To safely complete this essential work, we will **temporarily close one lane on Railway Parade and Guildford Road until early May 2025**. Some footpaths around the area will have partial intermittent closures and detours.

We will aim to keep impacts to the community to a minimum wherever possible and keep the area tidy.

We thank you for your understanding and cooperation whilst this essential work takes place.
